info@myaplastic.com

MYA Plastic was founded in Germany in 2010.

Established in 2010 as a supply point for drill pipe and its accessories needed in Germany and other European countries, our company, with its 10 years of experience in the industry, saw the desired quality and service needs in the requested product and investment. It became 2019 manufactured in the Erzincan Organized Industry Zone and added its manufacturer identity as well as its supplier identity. In this way, our company, which is one step closer to its goal of offering maximum customer satisfaction in the production, sales and service channels, works uninterruptedly with new investments, R&D and service quality studies and is on the way to becoming the leader of the brand industry.

Our mission is to produce high quality plastic pipe that meets different industry needs and provide fast and customer-centric service by establishing long-term sales channels.

We sell our MYA Plastic PVC Drilling and PE (Polyethylene) Spiral Pipes which we manufacture at our factory in Erzincan Organized Industrial Zone which operates on a total area of 20,000m² of which 5000m² is closed and 15,000m² is open Area to many countries in the world, especially Germany and other European countries. .

The highest quality way to reach water.

Production point in **European** norm standards

100% QUALITY ASSURANCE

With our quality-oriented, fast and flexible production infrastructure, our competent production, sales and service team, our products according to European standards and our production, service and after-sales programs that we have developed together, we are confident in our industry with universities and industry experts by acting with the mission of continuous investment and development.

myaplastic.com

With us you reach **The Water**

Our main task is to support the development of our industry by producing reliable and economical products in the drilling and other plastic-based pipe industry, in which we have been operating for many years, and by selling these products to the whole world with a high quality Offer service Infrastructure.

With this in mind, we work with our new and state-of-the-art production lines according to European standards, our R&D and academic collaborations that we have built with the mission of continuous improvement, and our flexible and open production and service approach to produce sustainable and innovative solutions for access to and transfer of water.

TAKE YOUR STEP TO STRAIGHTEN YOUR INDUSTRY AND MORE VALUE TO LIVE!

To be accepted as one of the brands that guide the sector in national and global markets with our production and service system that respects life, nature and all living beings, always prioritizing the satisfaction of our customers and employees.

To be the pioneer in the industry by creating long lasting and high quality products by ensuring that the products we make are sustainable and source is used in the healthiest way.

Water will come

PVC well pipe, which is much lighter and easier to install than the steel pipe long used for drilling, also eliminates the risk of rot and corrosion.

We bring water to the future!

OUR VALUES

Our priority is to ensure maximum satisfaction with the products and services we offer to our current and potential customers. We define our production and sales principles within the framework of long-term business processes and continuity in customer satisfaction.

Hence:

We use a uniform quality management system for the products we manufacture.

We produce special solutions for the needs of projects, individuals or institutions.

Thanks to our fast and flexible production capacity, we bring the right product to the customer at the right time.

Thanks to our open and reliable communication networks, we offer fast and accurate answers to your inquiries.

We always fulfill our promises in customer relationships.

OUR ADVANTAGES

Constant assurance of quality standards

We are meticulous and sensitive in the services we provide during production and after sale at our MYA plastic manufacturing facility. The product you request from us will always and always be delivered in the best MYA quality.

Production in real quality standards

We know very well the customers needs and requirements as well as the actual quality standards, since we started this sector with the drill pipes, supplying their equipment and installing the pipes in the first place. For this reason, our priority has been to meet the demands in our productions and offer a quality that exceeds expectations.

Custom production for individuals, institutions or projects

In addition to the standard sizes, we can make custom orders for the company, person or project. Together with our specialist staff, we implement special and fast solutions for such requirements. With this in mind, we can customize the lengths and filter sizes of the pipes we manufacture, and make our pipes closed, with or without sockets, and with filters according to customer requirements.

R&D investment and continuous improvement

We are confident and confident in the products and services we offer you thanks to our R&D studies conducted with university-backed laboratories, academics we work with and industry experts.

Fast, complete and timely delivery

We know the value of time. We project the requests we receive in the most appropriate way with our right communication infrastructure and ensure results are achieved with fast deadlines that meet the needs without compromising our quality.

PRODUCTION

MYA Plastic's production facility is located in Erzincan Organized Industry Zone.

In our factory, which will be built on a total area of 20,000 m², of which 5,000 m² is closed and 15,000 m² is open, we produce PVC drill pipes and PE coil pipes. We sell our products manufactured in our factory to all European countries, especially to Germany.

Each product manufactured in our factory is made in accordance with quality standards and all stages of production are supervised by our team of experts.

With our R&D studies, which we carry out together with our university-based laboratory, academic staff and industry experts, we offer services with a continuous quality approach.

PVC WELL PIPES

PVC well pipe, which is much lighter and easier to install than the steel pipe long used for drilling, also eliminates the risk of rot and corrosion.

We bring water to the future!

PVC WELL PIPES

- Well pipes are produced and delivered according to customer requirements with sockets, without sockets, solid wall pipes and filter pipes.
- In addition to these standard sizes, we can produce in different sizes depending on customer needs and project requirements.
- The meter lengths of the pipes we produce are manufactured in various sizes (e.g. 1m, 2m, 4m, 6m) according to customer and project requirements.

Water is Valuable

Although a large part of the earth is covered with water, a very small part of it is fresh and usable water.

The United Nations says the number of people suffering from water scarcity could surpass 3 billion by 2025 if nothing is done.

Water, the source of life, is rapidly declining not only due to global warming, but also due to unconscious consumption.

We are committed to ensuring that water is reached in a sustainable and loss-free manner using pipes that are resistant to corrosion and rotting, leaving healthy and sufficient water for future generations.

Let's protect our water!
